# Pandoblox

## Problem:

Pandoblox's lack of expertise with th contributions to specific contracts.

## Solution:

Kuinua Tech was contracted to help provide continuous full stack development and power platform support for active contracts at Pandoblox. Kuinua provided expertise in utilizing data provided by clients based on sales, recalls, as well as other product information and create interactive Dashboards in Power Bi equipped with power automate workflows in order to ensure data is as accurate as possible with workflows activating every hour to update the dashboard information. Kuinua also provided sharepoint developers in an effort to house all data in one place for better organization long term. Kuinua developed sharepoint sites and lists that acted as backing for the data showcased in the Power Bi dashboards.

<u>Competencies:</u> SharePoint PowerBi Power Automate

<u>Contracts Supported:</u> Nutribullet

<u>Contract Year:</u> 2022-ongoing

### Pandoblox's lack of expertise with the power platform and cloud limited their

# Business Cases

# **Blue Sky Innovative Solutions**

#### Problem:

Blue Sky's limited knowledge of cloud development and security compliance limited their growth.

### Solution:

Kuinua Tech focused on delivering automated solutions to remove the manual labor that slowed up necessary protocols and systems. Primary software focuses were Azure Active Directory, SharePoint, Exchange, Microsoft 365 Admin Center, Microsoft Endpoint Manage, and more. Details include but not limited to: Manage and monitor Office 365 services and desktop support, Administer and support Office 365 Azure and Exchange policies, Maintain a highly secure system through proper configuration and system access monitoring, Assist with the migration of data into the Office 365 cloud platform and Office 365 SharePoint, Administer and support Office 365 and MS Exchange policies, Design and implementing the company's SharePoint information architecture, Assist in the development and implementation of IT policies, Provide guidance, roadmap recommendations and strategic inputs as a SME of the platform responsibly including maintaining a Test Tenant, and Fields engineering-level Microsoft 365 escalations as well as root cause analysis.

<u>Contract Year:</u> 2021-ongoing

# SICION

# **Slolam Consulting**

## Problem:

Slolam's sharepoint on premise environment needed to be migrated to the cloud and further SharePoint development support

## Solution:

Kuinua Tech LLC offered comprehensive SharePoint migration and page development services to streamline and enhance their digital workspace. By ensuring a smooth transition, Kuinua Tech empowers Slolam to centralize information, simplify document access, and foster enhanced teamwork among their legal professionals. Kuinua Tech crafted SharePoint pages for Slocum Law Firm, meticulously designed to reflect their brand identity and facilitate intuitive navigation. These pages will encompassed a range of functionalities, from organizing case files and legal resources to enabling seamless communication among team members. Kuinua Tech's focus on user experience guarantees that Slocum Law Firm's staff can effortlessly leverage SharePoint's potential to boost productivity and responsiveness.

<u>Competencies:</u> SharePoint Site Development ShareGate Power Automate

<u>Contract Year:</u> 2023-ongoing

# **SSP Innovations**

#### Problem:

migration and python scripting.

### Solution:

SSP Innovations needed expertise regarding migrating google sites to SharePoint in a limited window of time in order to remain compliant. SSP also required Jira development expertise in order to migrate all links in dashboards and projects associated with the google site to now reflect the new Sharepoint site. Kuinua Tech's primary responsibilities were to migrate the active Google site data and pages to SharePoint online. This migration including linked files from Google Drive to be moved and repurposed on SharePoint. With the SharePoint migration automated and completed, Kuinua was tasked with migrating similar data from Jira linked dashboards with Google site and drive information, to then migrating new SharePoint links to these several dashboards. With over 52 dashboard entries and several thousand documents, Kuinua relied on creating python scripting in order to remove duplicate files, pages, and archive dashboards that were not being utilized in order to make the migration a success.

<u>Competencies:</u> SharePoint | Jira Google Sites Python

**Contracts Supported: 3GIS, Verizon, Augmented Global Solutions** 

**Contract Year:** 2023

#### SSP Innovations lacked senior SharePoint developers who had extensive knowledge in site

# **Cache Consulting**

#### Problem:

Cache Consulting lacked knowledge in custom website development with domain hosting and project management capabilities.

## Solution:

Kuinua Tech was contracted to provide web development and domain hosting for several clients of Cache Consulting. The services included developing custom web applications, designing user interfaces, and ensuring responsive design across multiple platforms. Kuinua Tech LLC also provided backend development and database management services to ensure the smooth functioning of the web applications. The goal was to help Cache Consulting's clients achieve their business objectives by providing efficient and effective web development services.

<u>Competencies:</u> Web Development CSS | React | Javascript Scrum

<u>Contract Year:</u> 2021-ongoing

# **Xcelocloud LLC**

#### **Problem:**

Xcelocloud limited personnel with power platform expert level skillset

#### Solution:

Kuinua Tech LLC provided high-level Power Platform architect contractors to resolve workforce issues at Xcelocloud. Xcelocloud was facing workforce challenges and Kuinua Tech LLC helped to address these issues by providing experienced Power Platform architects who could streamline and optimize Xcelocloud's operations. The contractors were tasked with designing and implementing Power Platform solutions that could automate workflows, improve data management, and increase efficiency. The workflows utilizing Power Bi dashboards for automated data reporting of ticket statuses on a monthly basis tied into Sharepoint ticket systems Kuinua Tech developed. The goal was to ensure that Xcelocloud could operate at peak performance and achieve its business objectives. The Power Platform solutions enabled Xcelocloud to automate various HR processes such as employee onboarding, performance reviews, and benefits management. The solution also provided data analysis and reporting, which allowed Xcelocloud to make data-driven decisions related to HR.

# **KB Homes**

#### Problem:

KB Homes required complex Power App development for inventory and project management

## Solution:

Kuinua Tech LLC created a Power Apps application for inventory management for KB Homes, which helps the company to manage their housing project inventory. The application allows KB Homes to track inventory levels, sales, purchases, and returns, and provides alerts when inventory levels are low or when a product is out of stock. Data sources were created within Sharepoint list, power bi dashboards, and dataverse tables. It utilized Power Automate workflows for automated functions that included Microsoft 365 connectors.

# YWS

#### Problem:

YWS required a full SharePoint migration alon required on going support as well.

#### Solution:

Kuinua Tech LLC, a leading technology solutions provider, conducted a thorough assessment of YWS's existing SharePoint environment, evaluating content, workflows, customizations, and permissions. Based on this analysis, a comprehensive migration plan was formulated to ensure a smooth transition to the cloud-based SharePoint Online platform. The migration process involved migrating documents, lists, libraries, and customizations, while ensuring metadata and permissions were preserved accurately. Rigorous testing and validation were conducted to ensure data integrity and functionality post-migration. Additionally, Kuinua Tech provided extensive training and support to YWS employees, facilitating their seamless adaptation to the new SharePoint environment. Working closely with YWS stakeholders, Kuinua Tech identified the organization's unique business needs and objectives. Leveraging industry-leading technologies and best practices, Kuinua Tech designed and developed custom applications tailored to meet YWS's requirements. The applications were designed with scalability, security, and performance in mind, ensuring optimal functionality and user experience. Kuinua Tech's experienced developers implemented advanced features, including metadata tagging, search functionality, and integration with external systems, empowering YWS to efficiently manage their business processes and collaborate effectively.

#### **Competencies:**

# **Our Internal Projects**

Our internal projects are the representation of creative technology and the core of our inspiration. We develop products that benefit our consumers by filling niche needs that are often over shadowed by the masses. We aim to support creative thought, build community, and promote useful innovations.

# Internal Project

# GeekELove

## Niche:

A geek community and dating application developed with nerds of color in mind that are looking for an inclusive space to find like minded individuals to build long lasting connections.

## Solution:

GeekELove is the passion project at Kuinua Tech- a dating app for geeks by geeks! Dating apps have become wildly popular. Right now, you can download a dozen of them and start swiping. Swipe long enough, and you may even meet someone you like. Here's the thing: because most dating apps try to cast a wide net, building up general user bases, they are not very useful if your interests are specific. In other words, you aren't too likely to meet someone who shares your passion for nerd culture.

## **Competencies:**

React Application Development Web Development Project Management

Project Status: 2020-ongoing

# Internal Project

# **#KuinuaTogether**

#### Niche:

Technology development and philanthro in the evolving world of tech.

### Solution:

Kuinua Tech noticed a need in their community for students and technology during the Covid-19 pandemic. Many students were left without access to technology in order to continue their education. Kuinua ensured that students in their community would have access to technology by donating several laptops pre programmed with the necessary capabilities in order to study from home during an online giveaway. Kuinua continues its philanthropy and support of upcoming generations through technology scholarships aimed at African American students at the owner's previous colleges of College of Southern Maryland and SUNY Alfred State College.

<u>Competencies:</u> Hardware Management Windows 11 Dell Laptops Philanthropy Scholarships

Partnered Colleges/Universities: College of Southern Maryland SUNY Alfred State College

<u>Project Status:</u> 2020-ongoing
